## Recycled Paper Pick-up Program

### Did you know ...

... the average office worker uses approximately 2.5 pounds of paper each week?

*That's between 120 - 150 pounds of recoverable white office paper a year.*

... about laws that protect the privacy and confidentiality of personal information.

*These laws place the onus on organizations and companies to protect and securely dispose of this information.*

... that thieves regularly troll dumpsters and garbage containers for casually discarded information?

*An illegal black market exists where this information is bought and sold. What are you doing to protect your confidential information?*

... what goes into making paper?

*Newly cut trees account for 55 percent of the global paper supply, while 38 percent is from recycled wood-based paper, and the remaining seven percent comes from non-tree sources.*

### We have a solution!

- ♻️ Regular pick-up
- ♻️ Safe & secure destruction
- ♻️ Cost effective disposal

Thousands of trees are saved from harvest each year due to paper fiber collected and processed by Capital Paper Recycling Ltd. Our trucks pick-up used paper from your office and securely transfer it to our facility. Once there ... it is shredded, baled and shipped to a paper mill to be made into recycled paper and other products. We also recycle used electronics ... a breakdown of the cost to recycle electronics will be provided upon request. **Capital Paper Recycling Ltd. ... a great solution!**
